Kaytuso: Educate - Cutting-Edge Cybersecurity Training
Detect social engineering attacks and other hacking techniques with our engaging, convenient training programs and practical phishing simulations

Short, consistent training sessions from an award-winning partner ensure that your staff are an effective front-line defense against cyberattack and data loss.

Research consistently shows that employee error is the most common cause of cybersecurity breaches. Because hackers are constantly adjusting their strategies to exploit unprepared staff, the only effective way to keep your company safe from attacks is to train your team members in the latest email and digital hygiene best practices.

Advanced training for any security challenge, including email, malware, ransomware, phone scams, ecommerce, social media hygiene, & more.

Over 20 years of dependable cybersecurity expertise and service.

A deep dedication to client success that's earned us stellar testimonials.

With love from New York City – serving companies nationwide

Our short, easy-to-digest online training programs enhance cyber awareness and readiness to tackle today's most sophisticated social engineering attacks.

- We customize each cybersecurity awareness or phishing training program **to address the unique vulnerabilities** and challenges in each organization.
- We provide training solutions to meet the needs of every industry, including the **healthcare, real estate, legal, and financial services fields**, as well as many others.
- Each training program comes with multiple digital resources to help your organization build a **culture of cybersecurity awareness**.

Sophisticated solutions to meet any security or compliance goal

Every training program reflects **our decades of experience** and expertise as a **trusted provider of cybersecurity solutions** to the US business community.

- Each of your staff members will **receive relevant, engaging, and concise online training modules every month** to guide them to better awareness.
- **Role-based learning and personalized training plans** ensure that each person in your company is receiving the intelligence and education most pertinent to their job.
- **Realistic simulations conducted by our team** augment your training and test your staff's ability to defend against real-world attacks.
- Access to reports and **analytics that highlight your workforce's level of preparedness** and empower your decision-makers to make more strategic, targeted improvements.

Training should be a top priority for any business that wants to protect itself from social engineering cyberattacks
